Creativity	Willingness to Learn
Teamwork	Self-Confidence
Flexibility	Task-oriented
Organization	Problem-solving

WORK EXPERIENCE

SOFTWARE QUALITY ASSURANCE ENGINEER

Österreichische Post AG

since 12.2021

As a QA Engineer at Post AG, I am responsible for monitoring, analysis and control of the quality status of software. Planning testing activities, preparing test data and QC tools, designing test cases, building test suites, implementing and executing tests, test automation development in c# and test reports are part of my job. My main goal is to build the confidence about software quality, make the QA/QC activities transparent and provide full traceability for each process in development lifecycle.

QUALITY ASSURANCE MANAGER

Escape Events GmbH

03.2021 - 09.2021

From the software to hardware - I did the inspection, created documentation and discovered optimal solutions to solve indicated problems to guarantee the best quality to our customers.

HOTEL MANAGER

Suite Hotel 900m zur Oper

2015-2020

From the reception desk till the back office – I had an eye on everything happening in the hotel. Correspondence processing, supervision of booking services, accounting and audit, price management, event management, hiring and training new team members, crisis management, prognoses and market analysis, public and internal relationship management – all of these tasks were my responsibility as a hotel manager.
